

Vedic Theory of Universe Population Creation

Lord Siva takes part in injecting the living entities (souls) into material nature, creation of living beings, and destruction of Universe

The living entities (souls) are impregnated into material nature and based on their past deeds, they take different positions. The activities of the different species of living beings (bodies) are begun from the very moment of creation and the 8.4 million species of living beings are manifested immediately along with the universe. It is not that the activities or the variety of species are evolved. Humans, animals, birds, aquatics, insects, and plants, everything is simultaneously created based on the desires and deeds of the living entities at the last annihilation (last cycle of creation and annihilation). By the will and the inconceivable potency of Lord Krishna, everything is created, maintained, and destroyed. The creation takes place to accommodate the inclinations of the various living entities.

Lord Visnu, an expansion of Lord Krishna creates the first living being in the Universe, Lord Brahma. Who then creates the Manus, Sages, demigods, and women. From a combination of these, the human population of the Universe is increased. The animal and plant species also originate from Lord Brahma. Not all the species are present on planet Earth, and some species are not manifested during certain time periods. This process of creation is repeated in millions of Universes by the inconceivable power of Lord Krishna.

Abrahamic Religions Theory of Creation

Adam and Eve

They were created by God 6000 years and the population of humans on planet Earth originate from them

"All mankind are the children of Adam, and Adam was created from dust." (Hadith)

"God said 'Let us make man in our image, in our likeness.' " (Genesis 1:26)

Adam and Eve as the origin of all mankind is a fundamental doctrine of the Christian, Jewish, and Islamic faiths. Based on the Old Testament genealogies, it can be concluded that God created Adam and Eve around 4004 BCE, thus around 6000 years ago. This is also confirmed by many Christians.

The scientists in the field of human genetics indicate that it's impossible for the human population in the World to originate from one couple. Genetic evidence indicates there are at least 10,000 variations of human genetics and thus impossible for this to originate from two people. Anyone with some common sense can understand that a black couple cannot create a white man, and a white couple cannot create a black man, and neither of them can create a Chinese type of person. It's impossible for the variety of humans in the World to originate from two individuals, not even in a million years. The scientists have also proved that humans have existed for millions of years not just 6000 years.

The Abrahamic religion followers have absolutely no idea on the origin and number of plant and animal species, and they have absolutely no idea on the population of living beings beyond this planet.

The factual statement in the Bible on creation is that God is a person with a human like form. God created man in his image and likeness (Genesis 1:26). This is correct and that Supreme person from whom man is created in his likeness is Lord Krishna, who has appeared millions of times and each time proved he is the one and only God.
