Class notes:

we are silently watching what wrong going into this world.

we need the strong foundation of spirituality. without foundation there will no discipline.

without foundation there will be no peace .

we have to take a call for spiritual revolution. spirituality gives a proper guidance to our life, to decrease our problems. spirituality makes our deep rooted tendency to serve. the nature of world is dukhalayam asasvattam(permanently misery and temporary) svabhavala avashad naste(there is no medicine for character). if you are finding solution for temporary world then you will not get only. because the world itself is dukhalayam asasvattam can you see today's world by only misusing the technologies. we know things are out of control but then also we does what we like and when company said its not useful and very harmful too then also you all are going on to satisfy our taste buds. but some foolish people says bhagvan shivji drank bhaang or halal, some bogus spiritualist says shivji ne bhaang piya. and some foolish spirtualist or foolish babas says bhagavan prerana dete hai and that is the lack of education is only reason because people dont have proper education. because of lack of proper education people cannot undersatnd what is good and what is bad? completely immerses by doing only wrongs. there are 4 types of addiction in our society which shastras says:

gambling, illicit sex, meat eating, intoxication.. progress cannot happen unless and untill our foundation is not so strong. how do u understand our society is advancing? according to sb the progressive parameters of our society is only this classes are fullfilled and that classes is protecting 1.our brahmins,

2. protecting oldage person, 3. protecting child 4. protecting women and 5. mother cows.

1. cows. MB says if cows are happy then we are progressive. shastra says if we protect cows then we are developing our countries . whenever cows blood fall on ground then destruction is for sure.

hadith says we should not eat the meat of cow and any animals(eating of flesh of cows is banned) and it is also mentioned that cow's milk is pure and quran has the chapter known as holy cow, how can someone kills cows which is holy? MAHABARATA says if you have cows your 6 vamsas will satisfied. there are many pets but you never says that all pets are your mother but you says cow as a mother, because cow is a real mother as your real mother. when cow is there you will happy always. Bible also says that "thou shall not kill" so how come you are killing animals. so you should therefore protect cows. Lakhs of cows are slaughtered day by day. It's a very pathetic condition in our world.

2. protection of child. SB 1.8.5. says

Protection to children gives human form of life the best chance to prepare the way to liberty

of material bondage. Such protection of children begins with the day of begetting the child by purificatory process of garbadaan. Children are the future of the countries. There is no samkaras that's why children are not having samkaras.

if we give protection to child. just like mother of shivaji maharaja developed the qualities and character to shivaji and she made shivaji very intelligent and brave and full of good character, then we automatically protects child and built the qualities like shivaji. so we should protect children by only protection. those who drank a milk of mother in his childhood then he cannot go into a bad way because he got a whole and selfless love from his mother and he will always sees the women as his own mother. there is no respect to elders by child in today's world

If you can't get enough love from your parents you will definitely find love in another lady. And that is for sure.

3. protection of oldage.

this should be the category of the senior society. this category shows very high problems to oldage by their children. some children says oldage are the burden for us. there is very pathetic condition for the seniors when they are not getting any respect. whatever experience knows to senior citizen, then we the young generation should listen their opinions for our growing through life. senior citizen or oldage person is very important for us to progress in our life. please don't throw in oldage homes like a dustbin. we want experience from senior citizen. its clearly depicts in shastra.

4. protection of brahmana and 5. protection of women.

Human being is beyond that... Human being is tatva darshini.

brahmana is not born by birth, if born brahmana is not fulfilling qualities of brahmana then that person is not called as brahmana, he will called as shudra and if shudra is fulfilling the qualities of brahmana then he is a pure brahmana. brahmana is the intellectually class mind. so if u doesn't born in brahmana family but you have a brahmana then you are a proper brahmin. our intellectual society is human, those who sees beyond illusion. we have a last and important class of men called brahmana.

Protection of women: this class has to be protected not because they are weak but they are holding the future and higher cause in future and therefore we need to protect them as simple as that.

women and brahmin are very much important for our society so we have to give protection, they are not a weak person but they hold the future of our country that's why we have to give protection to them. eg. mahishasur and mother durgadevi. never ever underestimate the power of women. alexander the great also underestimated by the power of women, he dies because of female mosquito, haha:) there should be the tranquility in the world by protecting womens and brahmins. if society is not respecting womens then there will be the war like mahabarata. just like we are respecting our mother we should also give respects to another person's wife as a mother as described in shastras or scriptures. american society is the great number of rapist but that country is telling our india is the country of rapist. we are not satisfied that's the reason we want changes for our sensual pleasure. advertisement means programming your mind to get sensual pleasure. mr. obama says, our country facing racism till now also.. women have the nature of expanding the friends but advertisement wale shows negatives about womens. what a fool advertisements are..! similarly ajamila was also trapped in prostitute by the prostitutions. if there is no respect of women in society then that society is called animals and also shastra says if we disrespect women then he will be punished definitely, he will never disappear from his crime.

spirituality develops our mind towards positivity and who develops mind through spirituality.
ata kote dhavi man tete tuje charan- tukaram maharaj

last conclusion examples from our previous acaryas bilvamangal thakur.
(example from bilvamangal thakur addiction from chintamani prostitution)
All the problems will solve only by spiritual solutions.
And only spiritual solution is tangible to good results.

Thank you very much.
Hare Krsna
