Topic - ***Ready to Revolutionize***

By Braj Mohan Pr

Notes -

- Most people don't need to be taught, they just needed to be reminded. So, those principles need to be reminded
- Main thing in life to keep main thing as main thing
- It's not knowing it, but what you are now doing it
- Technology revolution doesn't make us
- When technology supports humanity, then that technology will become revolutionary otherwise technology will become degradation
- We IITs Btechs generally called as bhatke and mtech they call as matke
- The whole training in IIT is to be hatke
- It's not that machine breaks but people's breaks
- So many engg needs to fix machine but when people breaks then we need the people to fix the people's heart
- What is the most imp factor needed to someone to be successful?

NICE - Observation -

- The most imp factor needed to be successful is observation
- This observation ability to see properly where we can take those steps to become successful
- We tend to miss so much learning because we don't have quality of observation
- ***Supreme Lord and balarama who are like spiritual master and supreme lord. They came here on a talent hunt for selecting proper candidate for a mission of establishing dharma***
- ***In assembly all the qualified candidates materially were present there and in amidst krsna and balarama was observing that who is that talent and attitude to be an instrument in my mission.***
- ***Almost all of them had a mood of overpowering.***
- ***When arjuna comes to see the bow, he doesn't get overpowered by it and many times when we see the great challenge we just get totally shrunked into our shoes that we cannot be able to perform.***
- ***So, capacity is there but arena and intensity of the atmosphere just makes blind and we cannot be able to perform***
- ***Similarly, arjuna comes when all the kshatriyas lost and it was disgraced of whole of the kshatriyas and leadership of the society and people would have lost faith.***
- ***Compromise people trust in the leadership***
- ***If kshatriya wouldn't fulfil the promises then many times brahmanas come to rescue them to establish that trust***

- **When arjuna comes first he circumambulates the challenge and honors it, he doesn't disrespect and neither he was overpowered by it nor he was overconfident**
- **Whenever we take up the challenge something difficult usually we take too easily and they fail and someone takes too seriously that they cannot perform. Example - Fear of Public Speaking**
- **Mood of arjuna was - being confident in his own ability but that confidence didn't turn into arrogant where he disrespects his challenge or demeaning the challenge**
- When a person is tested in different points of view - social, financial, physical its that passing the test
- **This showed to krsna by not just ability of arjuna but also the character of arjuna.**
- **Our talent and attitude both are imp to progress in our career or achievements**
- If you really want to grow our life, you need to have observation and basically this is lacking in today's age
- If you really want to improve on it, then you need to observe and that element of observation is missing
- Many times our life is temple run getting away from all these
- Just like in cricket fields that there is observing strengths and to be able to observe in different aspects of person and to ourselves where we crater into.
- If we don't observe the need then you may spoil the relationship and bonding to move ahead in relationship

Needs
Interest
Concerns
Expectation

- If you are able to do these 4 things then you have proper or nice observation
- **If you just have talent, but not good attitude of being respectful either people or projects then we tend to abuse them or neglect them/**
- **Krsna appreciated this wonderful quality of ability, talent and attitude in arjuna**
- **Arjuna was very much capable but krsna saw pandavas that they are not properly placed**
- **Every talent also needs a proper place where it is flourished**
- **Krsna observed everything strengths about arjuna and at the same time he observed limitation**

KISS your Limitation -

Keep
It
Simple and
Significant

- Many times we fail to observe limitations in our life and if we observe limitations then our things defend to us
- The element arjuna has to fight to administer the quality and this quality can flourish into particular environment and if we don't expose into certain element then
- Krsna saw limitations of pandavas to resign themselves to go back to hastinapur and this is not the place you will flourish and if not hastinapur, you can consider drupada for the opinions
- Limitations inspires creativity
- When you face your limitation, then the same limitations you are facing, others also facing some other limitation. So let me not think about so much but how limitations can give us strength
- Just like we have limitations, mind also have limitation to process the data and mind selects what is imp to it but it selects particular data which is needed
- Even people have limitations and the main thing people have limitation to much understand and observation is to see what is
- Trying to know how significant we must need to technology is as simple as important
- The more you understand people then you will be more successful
- Although FB IG have so much limitation and the more the people to handle that data that is there
- This the limitations showed to krsna by not just ability of arjuna but also the character of arjuna.
- Our talent and attitude both are imp to progress in our career or achievements

MERA Discipline -

- Discipline is the element that takes our life to from rock to sculpture and to make rock into sculpture requires discipline
- Krsna asked arjuna to make
- One is inner discipline about attitude and out discipline is habit
- Habit and attitude would chisel the hard rock into beautiful sculpture
 - M - Morning
 - E - Evening
 - Repeat (hammer)
 - The attitude is proper angle or patience which helps us to sculpt beautiful sculpture
 - Attitude (chisel)
 - Because we don't have right habit, we cannot move well and this attitude needs regular chipping away the distraction
- Discipline is the key to success to make your life successful
- To have a great discipline we need to have the -
- Morning and evening is the discipline is to make us proper adjustment
- If you don't have discipline then tag along someone to make us discipline

HI Gratitude -

- Almost every person needs to have grounding. Everyone will face the shocks
- Like anything big like laptops and fridge is earthing where the ions get easily

- affected to it. So, it needs grounding.*
- *Similarly, we also need to have grounding that I am here because I am standing on the shoulders of the giants*
 - *If I am able to see what is ahead because I am sitting on someone's shoulders. So, I am able to see it.*
 - *Those who are grateful that I am only adding what is actually seen*
 - *Newton said I am just a small child and whatever I am able to see is because of others*
 - *Therefore, Newton gives his experiment as Calculus which means small little sand*
 - *And anyone is successful and happy then has to be have gratitude where people have supported them*
 - *Many times, we don't observe the things which are around us which made us successful*
 - *We can take support who is around us and you be humble*
 - ***Humility and integrity is very imp to have heights***
 - *Just like kite flying in the air and has connected and holded with someone with thread that can kite can move higher and as the connection of the kite which is thread is break-off then kite falls down*
 - *That thread is the blessings we got from God, parents, to get to higher and higher and never falls*

*Thank you very much
Hare Krishna*
