Topic - Grass root of CORONA Virus

By *Shikshashtakam Pr @ Nasik*

Notes

When we live in the environment in this world as per the time, location and as per the circumstances, there are certain terms which we generally use is -diseased, epidemic, etc. this are the words are commonly used in today's world. pandemic and epidemic of corona virus even though they are not. When krsna talks about material world he talks about laws of material nature which governs the material world . Human being is the law abiding species. following any protocol for living is LAW. just like when you go to college you will be following certain law or protocol. you cant do the things what you want or need. even if you are walking as a pedestrian, and not following the pedestrian walking laws than you are doing wrong. So you have to follow the decorum of the world or laws of the world. even if you at home, you are free there are no protocols to follow but there is a code of conduct like respecting the family, extended family, siblings, mother and father. even if in the home are the code of conduct or discipline in the home.

So when krsna talks of material world, he talks about laws of material nature who do not follow the rules of the world who has the virus in the ecology in earth. When you do something patch work or fabric store and you cover it in the patch. This mean that just to dont feel shyness they do patchup. aajtak baad alag hai log patch nhi karte kapde ko. phate hue kapde pehnte hai. Now this corona virus are influence everywhere. why this epidemics are coming again and again? now corona virus, some years back there was a swine flu, and some years ago there was SAR virus, why this epidemic are becoming more ?why cant we go in a grass root level where human beings committing more mistakes again and again. Because we fiddle the material nature, hum material world ko ungli karte, jab we burn our fingers than we remember that we should not do ungli nhi karni chaiye. just see the terms to cover it. Just like cow is the herbivorous. and they were feeding the powdered meat to cow and so that they can have more flesh. Naturally, cow is the herbivorous animal. but when you fiddle with mother nature than natural arrangement of the core of conduct become the repulcusion. and you get diseased. why ? because you are playing with material world and material world is playing with you.

Now this corona virus came from Yohang where they get corona virus from animals because local farmers were in femine in the emergency situation,. anything they eat, cook and sell them, specially in yohang. Therefore, when this femine went gone, and the situation got restored that time they get hooked up to eat meat, and then once femine were gone and now they got hooked up of that itching.

so yohang was the city of selling all the types of wild animals from all over the world, and they were feeling boasting of that you will not get anything the world class meat of all types of animals. they were feeling that we are great. They were eating all types of

animals. since fish is flapping on the table and they are enjoying like anything. This is the innovative and creative method to satisfy our pallets. How long we fiddles to our nature when nature when gives it out than it gives out in the more unusual and most ugliest way. When i talking about people they were telling to me that we should not eat meat like that from market which is unhygienic from the market but there is a way. Just like in a house there is a rats, coackroaches, roadants flies, etc. why they are coming at home because house is dirty and filthy. and that family of that house are telling rather than cleaning the home they were saying which pesticides should we use ? which rat traps should we use? but no body is asking why this first this bloody rats comes ?Now in india, over here in nasik, people know the distinction between pros and flaws. Breaking the laws of natuire - its said that we can never break the laws of nature, we can break yoursel ffrom the laws of nature. So, how we trying to use our intelligence to cover up our fiddling the material nature using science and technology.

In BG krsna explains, use your intelligence to control your mind and senses in order to come out of the sense gratifactory life , use your intelligence. but now a days we are intelligently enjoying. when intelligence is used to curved down the lower tendencies that we are using our intelligence inorder to control it but out of control.

In mumbai, they are blindly immitating the west and in the west people by seeing that, they feel that its cool thing. They think that this is not just cool thing. For example take the meat eating. People are eating meat in such a way. the word meat in sanskrit is mamsa which means butcher is now killing that animal and in that another lives they will kill me, in such a way, every animal killing he should recite the word mamasa by reciting the word mamsa he will feel guilt and stop killing animals. Sanskrit or our vedic scriptures tells us to bring exposure to stop killing meat but modern civilization are covering up that,...Just like if anyone, anytime would see what happens through this windowless rooms, the screams of animals, and how mercylelessly in the pool of blood - not just in the pool of blood but in the STOOLS, they are slaughters, brutally killed and then in a sophisticated way when the processed food come to the market, and sometimes they see the cooks meat they cant even see what behind the protein what is that meat.

One time an experiment did in UK that a small child loves the chicken burger and her mother asked lets make it live in home a chicken burger. than she brought chicken to kill and given knife to that child. that child started flickered and started freaking out because that kid was never told that in between the two buns of bread is mangled piece of meat of this life of this innocent animal, AND, similarly, its happening now when no body is going to the root cause of this corona virus coming us. It will coming up this kind of bacteria or virus when you dont have any single clue to cure it and now they are saying wash your hands, dont touch your face, mouth and eyes,etc. jaha pe pahile hath nahi dalna tha waha dala aur abhi bolrahe ho muh me hath mat dalo, handsanitizer lekar ghumo. So, this is because they are not following the harmony which is given for us than nothing like this happening then we repeat the BG - many times people mock up us., teasing us and they says us ghaaspoons baba. and now elitest celebrity of the world are becoming vegan.they are beyond. Virat kohli became vegan. Just because we think that our role model is becoming superstar and i want to become like him. first you follow the diet what he follows. So, he is becoming vegan.

Rather than becoming coprotectors with mother nature, we are becoming fiddlers and discard between other species and human beings, because of this we are creating havoc. and in between the other species also we becoming havoc. One psychology said, if we wipe out all the human species from this mother earth, this planet will benefit immensely ecologically. All the pollution is created by human beings. All the forest got densed, it will get regenerated if we wipe out human species., This unnatural virus, bacteria, are happenings in today's world will be all rooted off. and out of that, that psychology said if we removes one species other than human species from this planet it will heavily ecologically imbalance. And, So, by ecologically we are the most unwanted species and we boast ourselves about that and we starts to blame for animal for that and we starts killing the viruses and bacteria. and these viruses looking at us and says- tumne hi shuru kiya tha aur kisne bola tha bat ko khao, chipkali ko khao, ye bhi khao aur ab hum tumko khao. When we say follow 4 regulative principles than you used to say that - kya bichede hue log hai-you are all backdated people - ab khao mutton. khao aur meat, and you are all eating ghasphoos-protein chaiye protein.

This seriousness of the matter that people are dying. no matter what people does sanatize, people are dying rampantly. Otherwise, people are dying with other reason but it wont come in news so much. but this is coming in news because it is becoming very so quick. But why people are alarmed by this corona virus that i didnt done anything that just i touched something and i got corona virus by touching somewhere corona virus left that. What is my mistake ? Answer from corona virus - tum insaano ne milkar jo terror machayi iss prakriti me, aur iske bhagidar hum directly/indirectly bante hai (You are all human beings who made troubles in material world are those who directly/indirectly are the culprits for forming disturbance in the material nature)..

just like you may be giving so much money buying chinese products and then by our money they eats stupids and idiotic food where it can happen disturbance in the material nature. jistaraha humne hi apna paisa dekar khaareeda unke products ko aur humne indirectly keh diya jaa tu jaa makhi ka soup kha, crocodile ka soup kha, machar coackroaches ka soup pi. aur hum bolraha hai tumne tumahara paisa khaya, hum bhi apko made in china virus dete hai. THIS IS CALLED BOOOOMARANG EFFECT. BOOOOOMARAANG EFFECT means you think that it wont comes back to you but its come back to you in a more ugliest way. Therefore, point of this case is here that we have to go to the root cause of thats what our acharya says in the vedic text is the only majoy problem in the world today is lack of krsna consciousness. Krsna Consciousness means what you see, what you eat, what you hear, what you association, this life style is included in the package of krsna consciousness. And, the only solution is to become Krsna consciousness.

- The only lack of problem is Krsna Consciousness and The only solution is Krishna Consciousness.
- Whether there is epidemic or whether there is no epidemic, thats what we are here to trying to educate in such type of programs, program after program, prerna after prerna, lecture after lecture. Even if you are healthy right now, but if your life style is not leading you into a healthy future WARN Yourself, TAKE GUARD of Yourself.
- This is what we say during peace time also and pieces time also. If we are really

think that we are intelligently species lets become proactive and becomes sensitive as a human being or as a part of ecology of mother earth, lets become a natural cooperater of this mother nature and not a competitor and definitely not a fiddler(ungli karna) to the mother nature or a destroyer of this mother nature.

Thank You very much
Hare Krishna
